Comments

1. found with 10459 & 10461

2. distinct facet on poll edge.

[Continued from 10459] ... many specimens have been found at windmill Mill, near Avebury. The pottery is black on the outside, & an attempt will be made to reconstruct the small pieces into a vase or dish. (info probably from Mr J. Dunn, headmaster of C of E school, Burton Latimer, who identified cells as Neo.).

1938 correspondence shows finder (A.J. Potter) offered 4 for sale to museum, intending to keep 2. Elsie Clifford asked Potter for permission to publish. 3. given, 1941.
