- Comments
1. fresh condition, apart from staining + patina.
 2. on back face, blade consists of 'hatchet' flake scar, about half of which has been removed by scar running from the edge parallel to long axis of cell - i.e. 'hatchet' blow was not final shaping act.
 3. B.H. 35.
 4. Wheeler 1993, Fig 39.1 (shows front face + left side)
