Comments 1. A masterpiece. The flint is banded in a similar way to that from which the Newhouse, Haycastle cell (Tenby Mus.) is made, though not so prominently. The cortex is totally ground, & the resultant cream streak adds to the banded effect; the latter may be accentuated by the copper-coloured staining.

2. The blade edge is fresh, but small flake scars along it (most < 2mm long) mean that much of it is missing.

3. Devizes Catalogue II, Cunliffe & Goddard 1911: no. 7 (p. 5), Pl. iii. 3. One of a hoard of 3. (for 2nd, cf. DM 1482)
