

Comments

1. patinated scar on left side edge near post.
2. All three 3 uls in fresh condition. Growing on no. 2 postdated flaking.
3. Cortex on all 3 are similar: white with dark brown weathered surface.
193 are identical in colour - light grey, with indistinct paler mottling. 2 is darker grey with more distinct yellowish mottling: note large old scar surface.
3. found whilst excavating entrance drive to Barnows wood, Sware, Guildford on April 9, 1937. (letter from Hinder, W D Barnes-Brand, in BH)
